

Skyuka Hall  
Chattanooga, TN  
K - 12  
100 Students

# CHALLENGE Accepted!

Shortly before the 2018-19 school year started, a water main in Chattanooga, TN burst. Just feet away was the three-year-old school, Skyuka Hall. The water main break sent hundreds of thousands of gallons of water onto the roof of the school, and in a few hours, the building collapsed.

Not deterred, the staff opened Skyuka Hall a few weeks later in a new location. The 100 students came to school not sure what to expect, but they were met with a staff that was committed to their growth as students and as people.

Skyuka Hall is a private school dedicated to students with learning differences. This mission allows the staff at Skyuka Hall to tailor the environment and curriculum to each individual student.

“The challenge is the program is different for each of our students. Reporting to our board and to our parents about how we are doing as a school is next to impossible. *ion* helps change that dynamic” reflected Melanie Covert, Director of Academic Affairs and Programming for Skyuka Hall.

“We chose *ion*, first because the leadership of *ion* understands who we are and why we exist as a school,” said Covert. “But, *ion* also provides the framework for us to have conversations about our data, and begin to take a systematic approach to growth.”

“Having a system like *ion* is life-changing for our kids” said Dr. Josh Yother, head of school for Skyuka Hall.

Using *ion*, Skyuka Hall is excited about being more mission driven and data supported to maximize student learning. We’re excited too!

## The Challenge

- Scattered, inconsistent use and understanding of data
- Unable to pull school-wide reports

## The Solution

*ion* provided the centralized data system needed to efficiently monitor student growth

## The Benefit

- Improved data literacy
- Data-informed decision making
- Better understanding of student need

To find out about how *ion* can help streamline your district’s MTSS, visit our website or give us a call.
